China Fruit Seasonal Loading Calendar

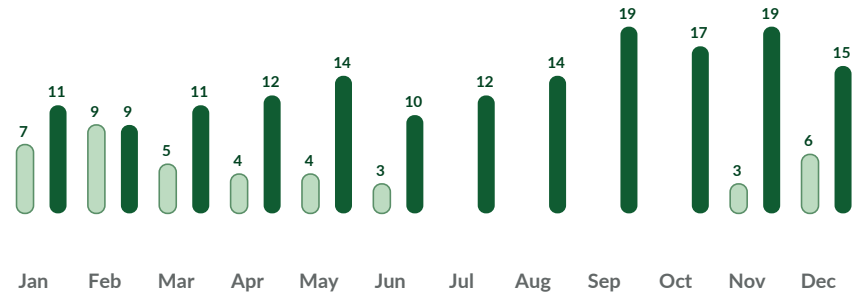

Harvest and climate-controlled storage windows for professional buyers

For sourcing decisions

This PDF shows you a China Fruit Season Calendar for buyers and replenishment or procurement management. A handy planning tool. Each fruit line is shown by month and by loading status, separating direct harvest loading from climate-controlled storage loading. Use the tool as an indication and always request for the real status.

Monthly availability count

Number of fruit lines available by source status in the uploaded planning sheet

Professional buyer interpretation

LOADING INTERPRETATION

DIRECT HARVEST LOADING — Loaded shortly after harvest and packhouse preparation. 3-5 days for fruit development after the pick and pre-cooling all needed to take into account

CONTROLLED-STORAGE LOADING — Storage availability; verify stock age and arrival quality.

Harvest months	Fruit can normally be loaded directly after harvest, selection and packing.
Stored months	Availability depends on storage protocol, stock rotation and remaining shelf life upon arrival .
Planning note	Seasonal windows can shift due to weather, cultivar, region and logistics timing.
Suntein Global	Teams are always on the spot. Origin knowledge, packhouse control, quality checks and shipment planning in one sourcing process.

Source: uploaded workbook "china_fruit-calendar.xlsx". No external seasonal assumptions added; only presentation terminology and English typo clean-up applied.

SUNTEIN GLOBAL

Your Trusted Partner in Chinese Fresh Produce

Citrus loading calendar

Pomelo, mandarins, oranges, lemons and related citrus lines

DIRECT HARVEST | CONTROLLED STORAGE

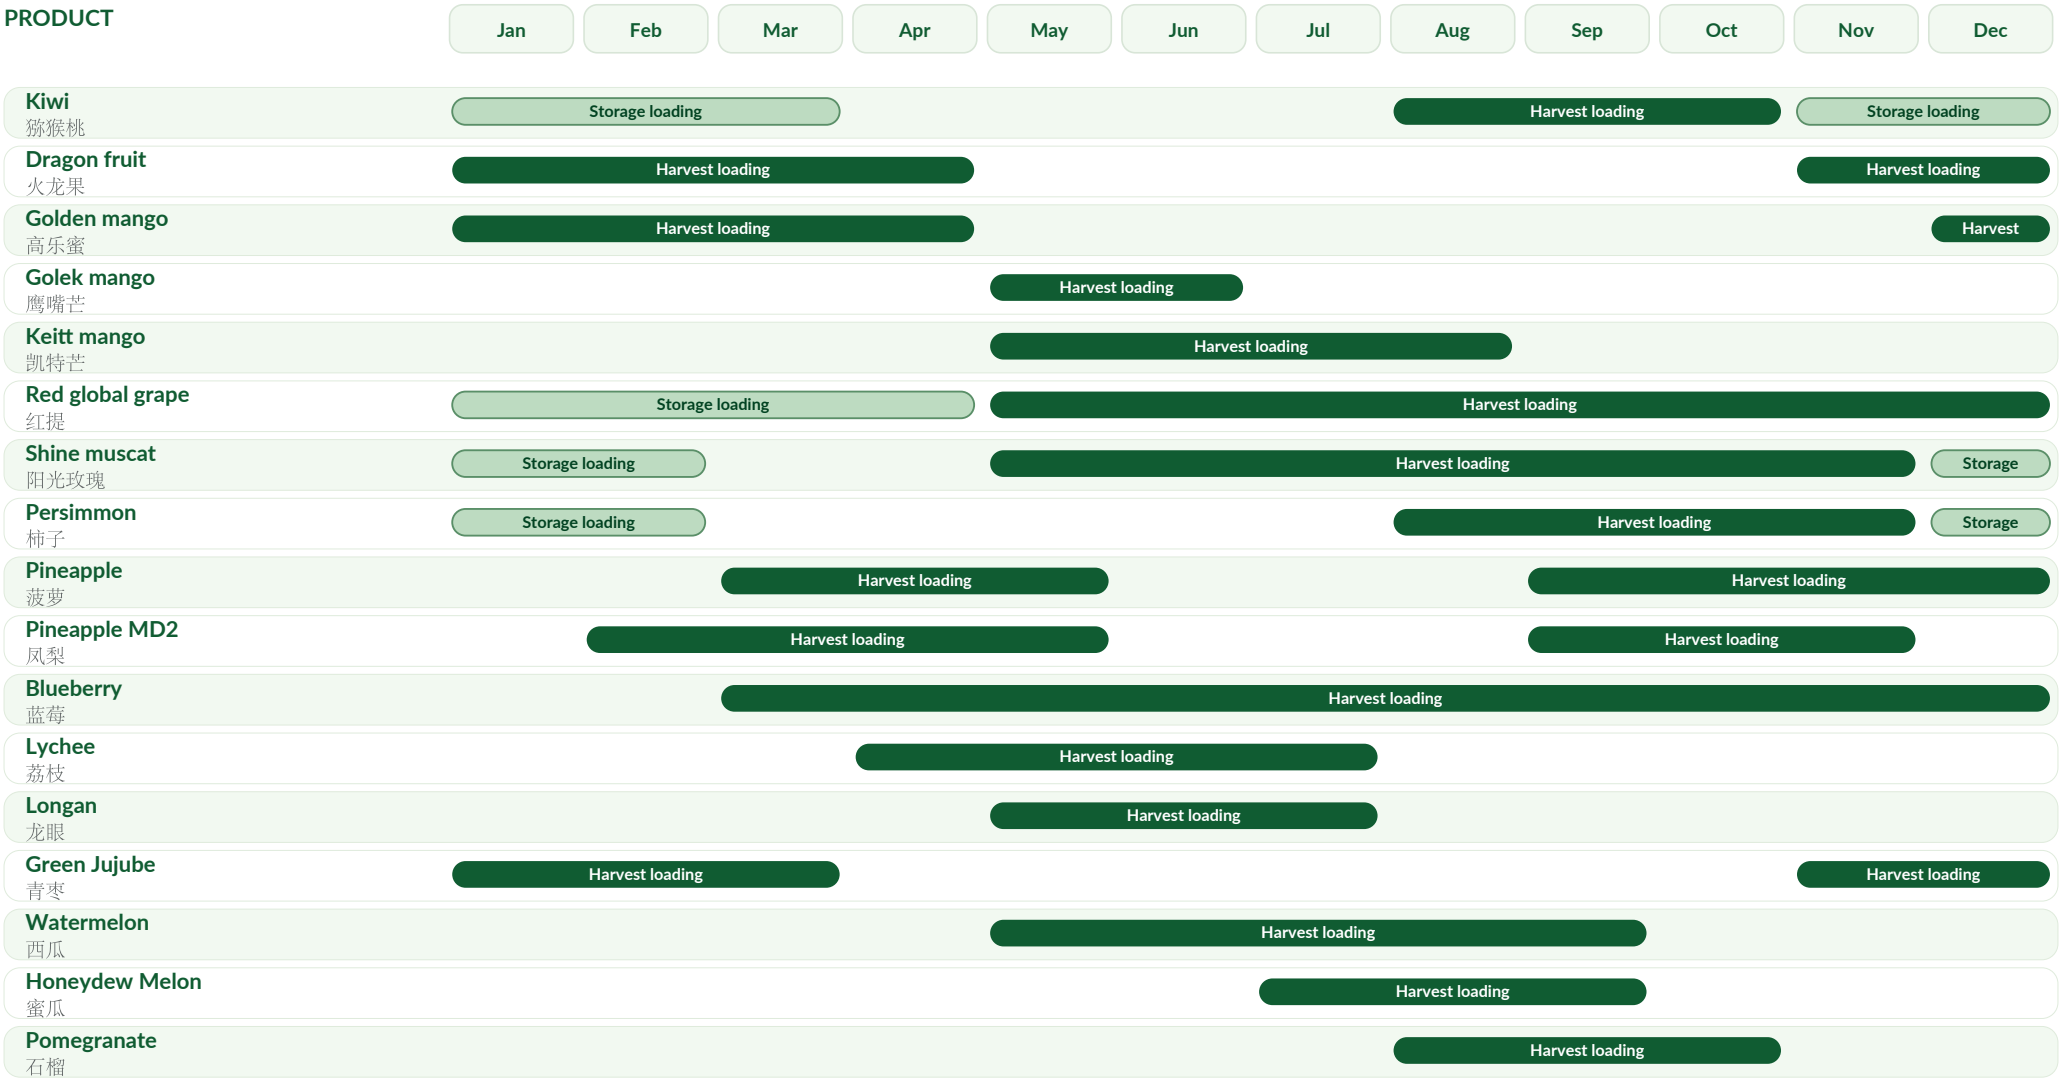

PRODUCT	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Pomelo 柚子	Storage loading							Harvest loading				Storage
Grapefruit 葡萄柚									Harvest loading		Storage loading	
Pomelo mandarin 桔柚	Storage loading										Harvest loading	
Lemon 柠檬	Storage loading								Harvest loading		Storage loading	
Hallabong 丑橘	Harvest loading										Harvest loading	
Papagan 耙耙柑	Harvest loading											Harvest
Wo mandarin 沃柑	Harvest loading					Storage					Harvest loading	
Newhall navel orange 纽荷尔脐橙	Harvest	Storage loading								Harvest loading		
Powell navel orange 鲍威尔脐橙			Harvest loading									
Nanfeng navel orange 信丰脐橙	Harvest	Storage loading									Harvest loading	
Murcott mandarin 默科特柑橘	Harvest loading											
Sweet mandarin 大蜜橘									Harvest loading			
Nanfeng mandarin mini 南丰蜜桔									Harvest loading			
Sugar mandarin mini 砂糖橘	Harvest										Harvest loading	
Mini mandarin 马水桔	Harvest loading				Storage loading							Harvest

Buyer note: Citrus categories often show both harvest and storage windows. Suntein treat storage fruit as a separate quality decision, not a simple extension of harvest. Decisions differ per fruit type

Tropical, grapes, berries and melons

Export planning overview for non-citrus seasonal fruit lines

DIRECT HARVEST | CONTROLLED STORAGE

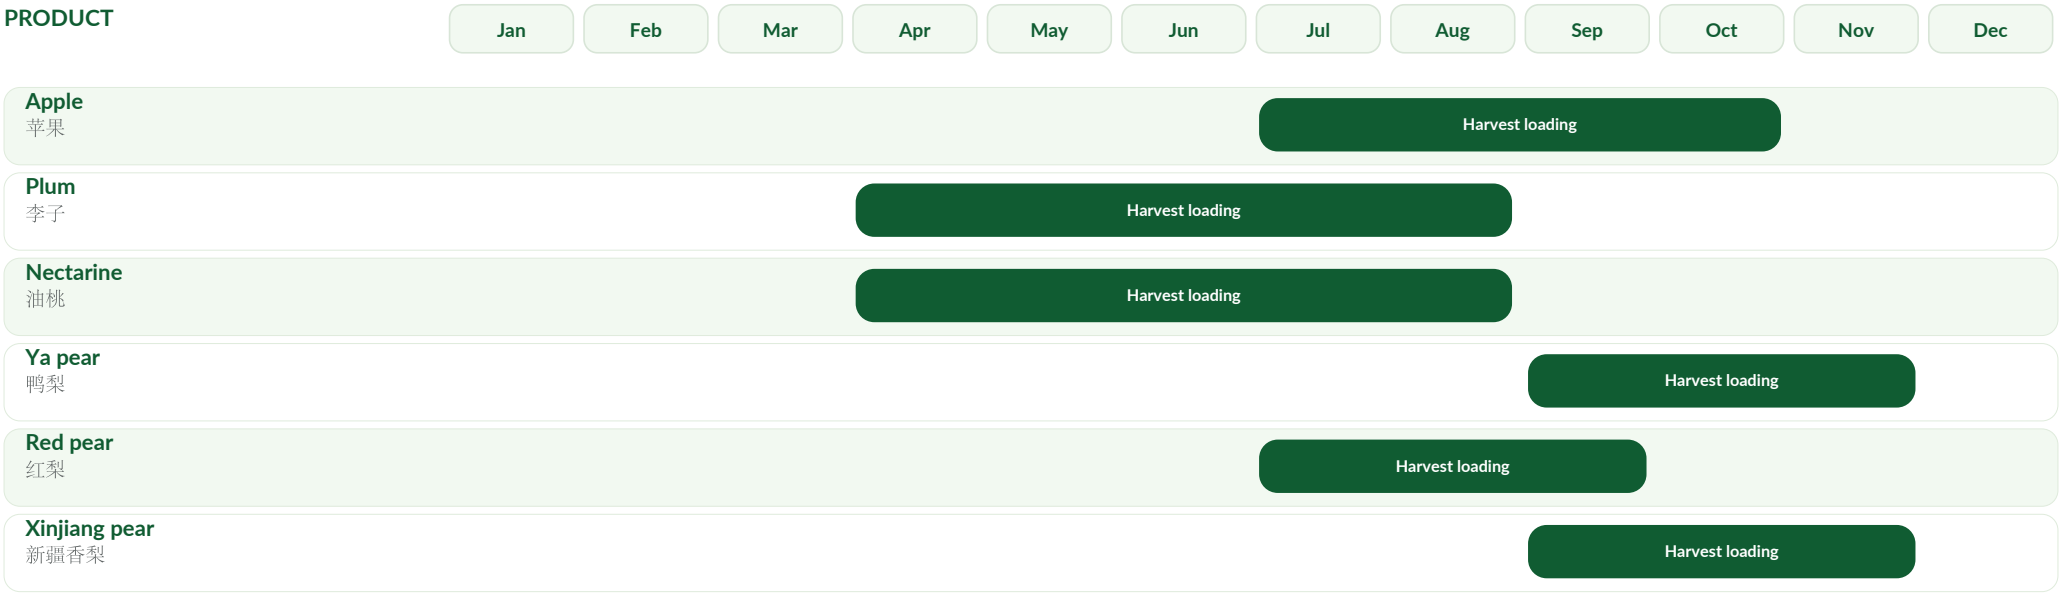

Buyer note: Tropical and high-value fruits may be more sensitive to handling, maturity and temperature control; confirm destination suitability before shipment.

Orchard, stone fruit and pear loading calendar

Quality and client demands are important

- Suntein Global keeps the FFV standards.
- Share your quality requirements to tune and mutually agree on the details
- Progams always discuss the possibilities.
- Tailored multi season programs for dedicated production, growth, harvest and quality is possible.
- Suntein Global quality inspections on locations by the client always possible.
- Quality inspection on arrival to check what goes in also comes out.

Buyer note: Orchard and pear lines are highly origin- and variety-dependent. Use this as a planning view before checking actual lot specifications.

How to use this calendar

Buyer guidance for China sourcing and seasonal programme planning

1. Use harvest windows for origin planning

Harvest availability indicates a direct seasonal loading opportunity. In practice, buyers able to make clear forecasts and align specifications, packing, eventual residue requirements before the peak months arrive always benefit in the long term. Spot buying is possible but always has a risk for seller and buyer. Suntein Global clients always receive good prices matching season and the market.

2. Treat storage windows differently

Controlled-storage fruit can be commercially valuable, but requires stronger verification of firmness, dehydration, decay risk, age of stock, pre-cooling and expected remaining shelf life at destination.
Pomelo's and Lemons are typical produce that can handle long storage times. A proper post harvest treatment is mandatory. So planning is highly recommended.

Never surpass Suntein Global in your China sourcing decisions

Deep origin presence

Knowledge of local growing areas, harvest timing and supplier capability.

Quality control discipline

Structured checks from orchard selection to final loading approval.

Logistics coordination

Cold-chain, documentation and shipment planning aligned with buyer markets.

Buyer-first communication

Clear seasonal guidance before decisions become urgent or costly.
